Recommendations (optional): Botium Toys needs to implement multiple controls to enhance security and ensure the confidentiality of sensitive data. These include Least Privilege, disaster recovery plans, strong password policies, separation of duties, intrusion detection systems, proactive legacy system management, encryption, and a robust password management system. To address compliance gaps, the company should focus on controls like Least Privilege, separation of duties, and encryption. Additionally, Botium Toys should establish a systematic asset classification process to identify and implement necessary controls for improved security and data protection.
